SSPPS Fall 2019 Electives
Thursday, September 26 - Friday, December 6

When enrolling in WebReg, please select the correct number of units from the unit drop-down menu.

SPPS 266 Veterinary Pharmacy
Section  985891
This course introduces students to veterinary pharmacy, challenges in drug therapy, pharmacokinetic/pharmacodynamic variances, ethical issues, law and public health, and drug administration. Students will learn many aspects of serving veterinary patients through lectures, discussion, exercises, field visits and a project.

Instructor  Karriker
P-Years Eligible  123
Units  3
Classroom  1186
Schedule  Thursdays: 3:00 PM - 4:50 PM

SPPS 267 Pediatric Pharmacotherapy
Section  985893
*** P3s ONLY ***  Through didactic lecture and case study discussions of common pharmaceutical care and chronic disease management challenges in the pediatric population, this elective provides students with specialized focus on Pediatric Pharmacotherapy. Reading materials and case studies will be drawn from clinical practice, primary literature, evidence-based medicine, and clinical practice guidelines.

Instructor  Romanowski
P-Years Eligible  3
Units  2
Classroom  1120
Schedule  Tuesdays & Thursdays: 1:00 PM - 2:20 PM

SPPS 270A Beginning Conversational Spanish for Pharm Students I
Section  985913
Designed to develop/enhance students’ working knowledge of medical/healthcare Spanish and cultural competency to facilitate communication with Spanish-speaking patients and families. Special emphasis on oral communication skills and clinical experiences. Open to beginners with no prior exposure to Spanish.

Instructor  Garcia
P-Years Eligible  123
Units  3
Classroom  1170
Schedule  Mondays & Thursdays: 3:00 PM - 4:20 PM
SPPS 272  Medicare Part D Outreach (Partners in)

Section 985895

Course teaches/outreaches in Medicare emphasizing Medicare Part D. Students provided with the knowledge and skills necessary to provide comprehensive Medicare Part D education to the underserved elderly and to help Medicare beneficiaries navigate the complex Part D system.

Instructor  Painter
P-Years Eligible  123
Units  1
Classroom  1160
Schedule  Thursday, October 3 & Thursday, October 24:  3:00 PM - 5:00 PM; plus self-study

SPPS 276  Current Topics in Drug Delivery and Development

Section 986574

Recently developed enabling technologies have changed the landscape in Drug Delivery and Development. This course will expose PharmD and graduate students to the most cutting edge developments in the field of Drug Delivery, Development and Dosage forms.

Instructor  Almutairi
P-Years Eligible  123
Units  1
Classroom  1182
Schedule  Mondays:  3:00 PM - 3:50 PM

SPPS 278  Free Clinic Manager

Section 985897

*** Must have faculty permission to enroll ***

Provides students the opportunity to work directly with an underserved population, provide patient education/counseling, and learn how to treat and manage chronic disease states that burden these communities. Students will receive administrative training in management, pharmacy operations and dispensing.

Instructor  Fricovsky
P-Years Eligible  23
Units  2-4
Classroom
Schedule
VR Manipulations of Drug-Macromolecule Structural Interactions

Where to find and how to visualize atomic structures of biologically important macromolecules, proteins and nucleic acids. Computer visualization and analysis of their atomic level interactions with drugs. Creating slideshow presentations with incorporated molecular structures. Presenting visualized structures in stereoscopic 3D. Using cutting edge visualization resources at UCSD to display and immerse into macromolecular structures in 3D:Oculus Rift VR classroom where 6 students at a time will be able to simultaneously use individual Oculus Rift based VR gear for immersive sensing and analysis of their molecular visualization classroom projects.

Each student will select drug*macromolecule complex of their choice to visualize and will have 5-10 min presentation time to emphasize most important atomic drug-molecule interactions in the system, based on visualization tool capabilities.

Special Studies - Tobacco Cessation Clinic Manager

*** Must have faculty permission to enroll ***

The goal of the free clinic TCC is to serve the underserved and provide behavioral counseling and pharmacotherapy recommendations to our patients. In addition to TCC, students will also treat patients in comprehensive fashion focusing on medication management in complex patients. This will be a pre-APPE study mimicking an APPE ambulatory care rotation with emphasis on TCC and medication management of chronic diseases.

SPPS 297c  Special Studies - Administration Pharmacy (AMCP P&T)

Section  985900

This course is intended to give students an opportunity to hone a variety of skills including critical analysis, presentation and research skills while gaining a real world perspective of the pharmacy management process. Students will become familiarized in evaluating the available scientific, clinical and economic evidence for a new molecular entity, conduct a cost/benefit analysis, assess the impact on patient population outcomes and relate drug therapy choices to practice guidelines.

Instructor  Watanabe
P-Years Eligible  123
Units  2
Classroom  1186
Schedule  Mondays:  3:00 PM - 4:50 PM

SPPS 297h  Special Studies - Current Concepts in Pharmacy Legislation

Section  985904

This course focuses on teaching students basic knowledge of the legislative process and fundamental advocacy techniques. Students will learn about current legislation relevant to pharmacy and influence lobbyists, legislators, and policy professionals. Throughout the course, there will be three mandatory meetings: orientation, Legislative day, and a lunchtime talk with a guest speaker who will present about their role in advocacy. After Legislative day, we will have a post-legislative day assignment for the students and a video assignment. Lastly, students will write a letter to their senator/assemblyman about any bill presented during Legislative Day.
